

Water Resistance

Watches water resistant to 30m, 50m and 100m are protected against:

Watches water resistant to 120m and 150m can be used for deep-sea diving and are protected against:

Watches water resistant to 200m, 300m and 600m, with unidirectional turning bezel, can be used for deep-sea diving and are protected against:

Every OMEGA will remain water resistant provided that the crown, pushers, crystal, case and gaskets remain intact. We recommend you have the water resistance checked once a year by a service centre or agent, if possible before the bathing season.
