- Automatic
- Chronometer
- Day-Date
- Sapphire crystal
- Anti-reflective treatment on both sides
- Sapphire crystal case back
- Water-Resistant to a relative pressure of 10 bar (100 metres/330 feet)

WATCH FUNCTIONS

The crown has 3 positions:

1. Normal position (wearing position): when the crown is positioned against the case, the crown ensures that the watch is water-resistant.

Occasional winding: if the watch has not been worn for 55 hours or more, wind it up with the crown in position 1.

2. Correcting the date: pull the crown out to position 2. Turn the crown forwards to change the date or backwards to change the day. Push the crown back to position 1.

NB: do not quit setting mode if the displays (day and date) are not properly centred in their windows.

3. Time setting: hours – minutes – seconds. Pull the crown out to position 3. The seconds hand will stop. Turn the crown forwards or backwards. Synchronise the seconds by pushing the crown back to position 1 to coincide with a given time signal.

NB: when setting the day and date backwards in setting mode, it is necessary to go back to 2 pm to ensure that the day and date change at the right time.
