

## SEAMASTER

AQUA TERRA 150M OMEGA MASTER CO-AXIAL 34 MM

Steel on steel

Caliber  
**8520**

**231.10.34.20.55.003**

-  Resists magnetic fields > 15'000 GAUSS
-  Co-Axial escapement
-  Si14 silicon balance spring
-  Automatic
-  Chronometer
-  Sapphire crystal
-  Anti-reflective treatment on both sides
-  Sapphire crystal case back
-  Screw-in crown
-  Watch with diamond(s)
-  Limited Edition
-  Water-Resistant to a relative pressure of 15 bar (150 metres/500 feet)

### WATCH FUNCTIONS

The crown has 3 positions:

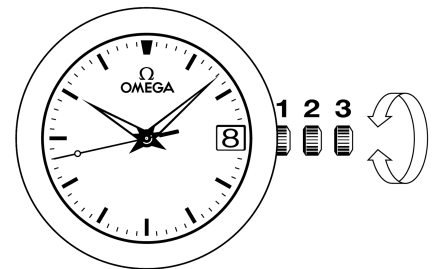

**1. Normal position (wearing position):** when the crown is positioned against the case, the crown ensures that the watch is water-resistant.

**Occasional winding:** if the watch has not been worn for 50 hours or more, wind it up with the crown in position 1.

**2. Correcting the date:** pull the crown out to position 2, turn the crown forwards, then push the crown back to position 1.

*NB: date-setting is not recommended between 8 pm and 2 am.*

**3. Time setting:** hours – minutes – seconds. Pull the crown out to position 3. The seconds hand will stop. Turn the crown forwards or backwards. Synchronise the seconds by pushing the crown back to position 1 to coincide with a given time signal.

### > 15,000 GAUSS

Your OMEGA watch is designed to resist a magnetic field of over 15,000 Gauss. This is an intensity higher than any to which it will be exposed in everyday use (for example, the magnet in a handbag clasp may attain 2,000 Gauss). Not only will your watch not stop in the presence of a magnetic field, it will not even suffer any loss of accuracy after being exposed to such a field.\*

\*Checked at 15,000 Gauss in accordance with standard ISO 764:2002.
