

SEAMASTER

AQUA TERRA 150M OMEGA MASTER CO-AXIAL 34 MM

Steel on steel

Caliber
8520

231.15.34.20.57.002

- Resists magnetic fields > 15'000 GAUSS
- Co-Axial escapement
- Si14 silicon balance spring
- Automatic
- Chronometer
- Sapphire crystal
- Anti-reflective treatment on both sides
- Sapphire crystal case back
- Screw-in crown
- Watch with diamond(s)
- Water-Resistant to a relative pressure of 15 bar (150 metres/500 feet)

WATCH FUNCTIONS

The crown has 3 positions:

1. Normal position (wearing position): when the crown is positioned against the case, the crown ensures that the watch is water-resistant.

Occasional winding: if the watch has not been worn for 50 hours or more, wind it up with the crown in position 1.

2. Correcting the date: pull the crown out to position 2, turn the crown forwards, then push the crown back to position 1.

NB: date-setting is not recommended between 8 pm and 2 am.

3. Time setting: hours – minutes – seconds. Pull the crown out to position 3. The seconds hand will stop. Turn the crown forwards or backwards. Synchronise the seconds by pushing the crown back to position 1 to coincide with a given time signal.

> 15,000 GAUSS

Your OMEGA watch is designed to resist a magnetic field of over 15,000 Gauss. This is an intensity higher than any to which it will be exposed in everyday use (for example, the magnet in a handbag clasp may attain 2,000 Gauss). Not only will your watch not stop in the presence of a magnetic field, it will not even suffer any loss of accuracy after being exposed to such a field.*

*Checked at 15,000 Gauss in accordance with standard ISO 764:2002.
