

## SEAMASTER

SEAMASTER 300 OMEGA MASTER CO-AXIAL 41 MM

Sedna gold on Sedna gold

Caliber  
**8401**

**233.60.41.21.01.001**

- OMEGA SEDNAGOLD™ Gold 750‰
- Ceramic bezel
- Resists magnetic fields > 15'000 GAUSS
- Co-Axial escapement
- Si14 silicon balance spring
- Automatic
- Chronometer
- Time zone function
- Sapphire crystal
- Anti-reflective treatment
- Sapphire crystal case back
- Screw-in crown
- OMEGA CERAGOLD™
- Water-Resistant to a relative pressure of 30 bar (300 metres/1000 feet)

### WATCH FUNCTIONS

The crown has 3 positions:

**1. Normal position (wearing position):** when the crown is positioned against the case, the crown ensures that the watch is water-resistant.

**Occasional winding:** if the watch has not been worn for 60 hours or more, wind it up with the crown in position 1.

**2. Setting the time zone:** pull the crown out to position 2. Turn the crown forwards or backwards, and the hour hand will move forwards or backwards by 1-hour intervals. Push the crown back to position 1.

**3. Time setting:** hours – minutes – seconds. Pull the crown out to position 3. The seconds hand will stop. Turn the crown forwards or backwards. Synchronise the seconds by pushing the crown back to position 1 to coincide with a given time signal.

### > 15,000 GAUSS

Your OMEGA watch is designed to resist a magnetic field of over 15,000 Gauss. This is an intensity higher than any to which it will be exposed in everyday use (for example, the magnet in a handbag clasp may attain 2,000 Gauss). Not only will your watch not stop in the presence of a magnetic field, it will not even suffer any loss of accuracy after being exposed to such a field.\*

\*Checked at 15,000 Gauss in accordance with standard ISO 764:2002.
