## Caliber <br> 2500

（⿴囗十）Co－Axial escapement
（＠）Automatic
Cosco Chronometer
Sapphire crystal
（ब）Anti－reflective treatment
Water－Resistant to a relative pressure of 3 bar（ 30
metres／100 feet）

## WATCH FUNCTIONS

The crown has 3 positions：
1．Normal position（wearing position）：when the crown is positioned against the case，the crown ensures that the watch is water－resistant．

Occasional winding：if the watch has not been worn for 48 hours or more，wind it up with the crown in position 1.

2．Correcting the date：pull the crown out to position 2 ，turn the crown backwards，then push the crown back to position 1.

NB：date－setting is not recommended between 8 pm and 2 am ．

3．Time setting：hours－minutes－seconds．Pull the crown out to position 3．The seconds hand will stop．Turn the crown forwards or backwards．Synchronise the seconds by pushing the crown back to position 1 to coincide with a given time signal．
