WATCH FUNCTIONS

The crown has 3 positions:

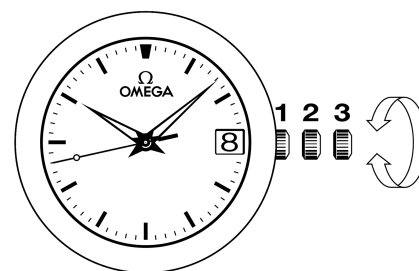

1. Normal position (wearing position): when the crown is positioned against the case, the crown ensures that the watch is water-resistant.

Occasional winding: if the watch has not been worn for 48 hours or more, wind it up with the crown in position 1.

2. Correcting the date: pull the crown out to position 2, turn the crown backwards, then push the crown back to position 1.

NB: date-setting is not recommended between 8 pm and 2 am.

3. Time setting: hours – minutes – seconds. Pull the crown out to position 3. The seconds hand will stop. Turn the crown forwards or backwards. Synchronise the seconds by pushing the crown back to position 1 to coincide with a given time signal.

FOLDOVER CLASPS

Using the fine length adjuster (fig. 5)

Using the diving extension (fig. 6)

Note: to fold the diving extension away, it is important to proceed according to fig. 6.2 (with the diving extension perpendicular to the cover of the clasp).
